

Civil engineering – ARA Suhrental, Triengen

Triengen · 2025

SERVICE AREA

Environmental work, flood protection, plant pipeline construction, civil engineering and road construction

PROJECT OVERVIEW

As part of an expansion and renovation, the Suhrental ARA has created a new settling and neutralization basin. As part of the ARGE TRIO Surental, we were able to devote ourselves to the construction of the plant pipeline, a stream obstruction using a natural stone wall and dewatering including surrounding work. We were also able to see the road surface with stones and surfaces.

Main quantities

Excavation 5200m³, backfilling 4050m³, service pipes up to DN800 2240 m¹, terminations 250m¹. Asphalt coverings 1260 tons
Environmental work, flood protection, plant line construction, civil engineering and road construction
